BISAZZA

DELFT BLUE

RED VERSION

*Celebrating a 15 year relationship
with Marcel Wanders.*

2019 celebrates the relaunch of the 'Pebbles' collection, which was first introduced 15 years ago and marked our first collaboration with Marcel Wanders.

This collection, now presented as a limited edition, continues as an imaginative group of low, brightly coloured coffee tables that radiate life and joy into any space.

Now featuring several new finishes, with versions inspired by tonalities of Blooming Red, Black and Delft Blue, the tables feature thousands of hand crafted mosaics, transforming a room into a mystical place of beauty.

Surprising in any environment, these unique pieces make guests feel as though they have stumbled into a secret field.

“ Sometimes when I think of design and interiors, and I trash the ignorant, the unthoughtful, the lazy and the tired use of white walls and under-inspired minimalism, I hallucinate and dream of a world, a design, a philosophy that truly builds on love, that builds on creativity, that builds on fantasy, and when I fail to explain my pain and try to express the urgency of my vision, I will proclaim vigorously that every square centimeter deserves our love, that every square centimeter deserves our thought, that every square centimeter deserve our attention, that the divine is in understanding relationships, that large and tiny are sisters that cannot be alive without each other's love, and then... I think of Bisazza!!

Together,
we make
the world
less
boring.”

Marcel Wanders
